***Terminal Disclaimer***

1. The terminal disclaimer filed on 03/06/2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,754,897 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: claims 1-3, 12, 21 and 22 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01, In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims.

The Applicant claims a method of scheduling operations for logical volumes in a data storage system (as defined at page 1 lines 8-25 and page 12 lines 2-9). The method determines, for a plurality of priority classes, which operations associated with each of the priority classes in the plurality of priority classes have been requested for a logical volume (as defined at page 2 lines 2-6, page 3 lines 1-13, page 10 lines 19-30 and page 11 lines 1-4). Based on the determination, the method selects one of the operations by performing a probability-based operations lookup (as defined at page 3 lines 14-30, page 4 lines 1-11, and page 11 lines 5-27), and wherein the probability-based operations lookup comprises using at least one table configured according to predetermined probability settings (as defined at page 4 lines 12-17, page 9 lines 16-30, page 10 lines 1-7, and page 15 lines 6-24), as specified in claims 1; and a method of scheduling operations for logical volumes in a data storage system further forms a

plurality of first selection values, one corresponding to each of the priority classes in the plurality of priority classes, based on the determination (as defined at page 21 lines 6-20), selects one of the priority classes in the plurality of priority classes based on the determination (as defined at page 21 lines 21-30), and selects a corresponding one of the plurality of first selection values corresponding to the selected one of the plurality of priority classes as a lookup index pointing to one of the entries (as defined at page 22 lines 1-10). The probability-based operations lookup has a first lookup level corresponding to a probability-based priority class lookup and a second lookup level corresponding to the probability-based operations lookup, and wherein selecting one of the priority classes in the plurality of priority classes (as defined at page 21 lines 21-30). The method further derives a second selection value from the first selection values (as defined at page 21 lines 6-20). Using the second selection value as a first lookup index at the first lookup level and using the selected one of the first selection values as a second lookup index at the second lookup level (as defined at page 2 lines 14-29 and page 17 lines 7-16), as specified in claim 3.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
